

IOMEGA / MANUFACTURING & SUPPLY CHAIN

MANUFACTURING & SUPPLY CHAIN SUCCESSES

Re-engineered the HR reporting process during a two-month assignment. Rapidly designed a complex business objects universe against an Oracle data mart and recreated all their reports. Migrated Business Objects to the latest version. Designed and resolved security infrastructure for globally distributed HR querying. Prepared and administered customized training for the HR analysts. Supported HR generalists in new report development. Interfaced with Essbase and Iomega's Oracle HR data mart, for two of their complex reports that required a combination of the data.

OTHER MANUFACTURING/ SUPPLY CHAIN SUCCESSES

USANA, INC.

Set up a master installation of Business Objects, designed the universe, provided individual training, and recreated five of their top reports in an eight day period. Created an Executive Information System, using ReportScript. Customized drill-down with enhanced security giving end-users the ability to drill only portions of the database. Later work included data design for an additional data warehouse and performance tuning.

ESSILOR

Essilor International only has eyes for eyes. Banking on the fact that one-fifth of the world's population wears glasses, the company is a leading maker of ophthalmic products and supplies, particularly corrective lenses. Essilor distributes its lenses through a global network of about 250 company-owned prescription laboratories, as well as through independent labs. We provided ETL expertise and Development of an existing 500 GB enterprise-level data warehouse environment.
