

GOLDCORP / MINING

REPORTING AND ANALYTICAL ISSUES RESOLVED BY FUSION

Goldcorp is the fastest growing, lowest-cost senior gold producers with operations and development projects in politically stable jurisdictions throughout the Americas. Goldcorp's strong project pipeline is positioned to drive long-term, sustainable growth. One of the largest gold mining concerns in the world, Goldcorp is a Canadian company headquartered in Vancouver, British Columbia, employing more than 11,500 people worldwide. Goldcorp is committed to responsible mining practices and is well-positioned to deliver sustained, industry leading growth and performance. Goldcorp endeavors to deliver sustainable prosperity for shareholders, employees, business partners and the communities in which Goldcorp operates.

RESULTS

STRATEGY:

Goldcorp's Operational Strategy is for Enterprise wide growth categorized, measured and organized across key groupings, as follows;

- People
- Safety
- Partnerships
- Margins
- Production
- Reserves

Goldcorp made a strategic decision to address inherent reporting and analytical limitations associated with the operational architecture, data sources and applications by embarking on an Enterprise Data Warehouse (EDW) and Business Intelligence (BI) solution. Fusion delivered a BI/DW Roadmap a DW Blueprint for Goldcorp at the Corporate and Mine level, phase one of the DW and an MDM solution.
